#### Introduction

This handbook is intended for Mentors in school and non-school settings who supervise SLP Interns from the San Francisco State University Department of Speech, Language and Hearing Sciences. Taking an SLP intern under your wing is a significant contribution to the profession of Speech-Language Pathology, as students are required to complete two internship experiences in community settings, each one semester in length. Through your supervision of student interns, you demonstrate your commitment to the future of the profession. The final internships provide the bridge from academic and clinical preparation on campus to professional practice in the field. This is a critical transition for the student, as they must now achieve independence in putting academic and clinical skills into practice. Through your mentoring and feedback, the student intern can make this transition smoothly and gradually. Your guidance and supervision enables the student intern to transform from role of student to the role of professional, ready to enter the Clinical Fellowship. Further, your mentorship provides a model of exemplary service to future professionals and colleagues.

The material in this handbook is meant to provide a guideline for both new and experienced Mentors, outlining the components of successful supervision and professional development for both you and the intern. The transition from a university-based Department to SLP practice in a school, clinical, or community setting introduces a number of variables to clinical practice, requiring the intern to apply knowledge and skills in a wholly new context. In addition to achieving clinical competence, the intern must learn to be a colleague who can collaborate effectively with other professionals, patients/clients and families. Your role as the Mentor is critical to the intern's success in transition from student to professional. This handbook is intended to define the phases of initial planning and goal setting, supervision, collaboration with the SFSU faculty supervisor, assessment and increasing professional independence for the intern. We hope that the tools provided here will enhance the success of your role as a Mentor. We deeply appreciate your contribution to the field and hope the mentoring experience with your SLP intern is satisfying and rewarding.

# Department of Speech, Language and Hearing Sciences

# Department Mission

The mission of the Department of Speech, Language and Hearing Sciences (SLHS) at San Francisco State University is based on our commitment to antiracism and other forms of anti-discrimination as fundamental to our professions, and essential to our preparation of professionals to:

- Identify, challenge and dismantle institutional, environmental, sociocultural, informational, attitudinal and linguistic barriers to accessible, equitable and transformative communication for individuals with communication disabilities and those whose right of expression are diminished or silenced:
- Develop, model, disseminate and adopt best practices in the provision of equitable, competent, compassionate and culturally/linguistically responsive services to individuals with communication disabilities across the lifespan; and
- To promote linguistic diversity and recognize the use of different languages and Englishes among our students and professionals as an asset to our academic and professional community.

# **Department Vision**

The vision of the SLHS department at SF State is to be a leader in the field of Speech, Language and Hearing Sciences for advancing critical thinking, equity and scientific rigor. We aspire to meet the challenges of creating pathways for recruiting, supporting, retaining and nurturing high qualified students and professionals that represent diverse histories, identities, life experiences, and perspectives. The SLHS administration, faculty, student body and professional partners represent a community of practice that respects and supports individuals with communication disabilities; that integrates research with clinical practice; that embodies equity; and that fosters an inclusive student/professional community in service of accessible communication for all.

To learn more about our vision, mission and goals, please refer to the SLHS Department Strategic Plan on the SLHS Department website: <a href="http://slhs.sfsu.edu/">http://slhs.sfsu.edu/</a>

# Academic and Clinical Preparation for Interns

The Master of Science Department in speech-language pathology at San Francisco State University is accredited by the Council on Academic Accreditation in Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association (ASHA). The curriculum follows ASHA standards that prepare the intern to develop knowledge, skill and clinical competency in each of the following areas:

- Articulation;
- Fluency;
- Voice and resonance, including respiration and phonation;
- Receptive and expressive language (phonology, morphology, syntax, semantics, pragmatics, prelinguistic communication and paralinguistic communication) in speaking, listening, reading, writing;
- Hearing, including the impact on speech and language;
- Swallowing (oral, pharyngeal, esophageal, and related functions, including oral function for feeding, orofacial myology);
- Cognitive aspects of communication (attention, memory, sequencing, problem-solving, executive functioning);
- Social aspects of communication (including challenging behavior, ineffective social skills, and lack of communication opportunities);
- Augmentative and Alternative Communication (AAC) modalities.

Prior to the school or nonschool internship, SLHS graduate students have completed the equivalent of 38 semester units of undergraduate coursework in the foundations of the above areas, graduate coursework and 2 supervised clinical practicum experiences with children and adults. Specific courses that are completed at the graduate level include the following:

Graduate Courses-Prior to Internship	Clinical Practicum-Prior to Internship
SLHS 701: Culturally and Linguistically Responsive	SLHS 880/713: Advanced Practicum
Practices in Speech, Language and Hearing Sciences	with Children
SLHS 702: Social Communication Development	SLHS 880/713: Advanced Practicum
SLHS 703: Research Methods, Evidence-Based	with Adults
Practices and Professional Issues	
SLHS 707: Serving School Communities in Speech,	
Language and Hearing Sciences	
SLHS 708: Seminar in Adult Neurogenics of	
Language	
SLHS 709: Seminar in Speech Sound Production	
SLHS 710: Seminar in Dysphagia	
SLHS 714: Interprofessional Education and Family-Centered Practices	
SLHS 754: Seminar in Voice and Resonance	
SLHS 756: Right Hemisphere Syndrome, TBI & Dementia	
SPED 743: Augmentative and Alternative Communication (AAC)	
(or SPED 746)	
Graduate Courses-Concurrent with Internships	Nonschool Internship
SLHS 757: Aural Rehabilitation (Fall)	SLHS 882: Advanced Internship
SLHS 706: Counseling in SLHS (Spring)	SLHS 712: Internship Workshop
SLHS 755: Stuttering ((Fall)	School Internship
SPED 746: Teaching Individuals with Physical	SLHS 882: Advanced Internship
and Other Health Impairments (or SPED 743)	SLHS 712: Internship Workshop

The SFSU SLHS Department has a strong focus in both the school and medical aspects of speech-language pathology, as shown in the courses above. Students are particularly well prepared in the basis of language disorders across the lifespan, but with a focus on the needs of children with communicative disorders (SLHS 701, 707, 708, SPED 743). Separate courses in swallowing and motor speech disorders provide in-depth coverage of assessment and intervention (SLHS 709, SLHS 710). Coursework in adult diagnostics (SLHS 756) also prepares students to conduct formal and informal assessments for clients of all ages. Further, students develop proficiency in all aspects of assessment, intervention, professional writing and documentation through completion of seminars and clinical practicum on-campus (SLHS 703, SLHS 880, and SLHS 713). Prior to entering the first internship, students have completed approximately 75 hours of clinical practicum on campus with children and adults. The range of clinical experiences at SFSU includes child clinics that encompass a range of options, including bilingual intervention in classroom settings, Autism Spectrum Disorders, AAC, and consultative services in preschool. In addition, SLHS students at SFSU may elect to complete optional specializations that include more extensive courses and practicum in AAC or ASD.

# Mentor Connection to the Department of Speech, Language and Hearing Sciences

Table 1 shows how Mentors are linked to SFSU, and who to call upon if you have any questions or concerns. The SFSU faculty supervisor is assigned to your intern by the Department Coordinator, and is your liaison with SFSU. A minimum of four formal contacts is planned during the semester and at least one of these contacts is an on-site visit; more visits can be set up as needed. The first visit is typically conducted mid-semester and a follow-up visit prior to the end of the semester whenever necessary. Regular informal contact is encouraged from the beginning of the semester, so that the intern, you and the SFSU site visitor are working as a team. All email communication between the Mentor and Intern should be copied to the SFSU site visitor. If concerns arise, the SFSU site supervisor is the person to contact for assistance. In addition, a member of the Internship Coordination team can be contacted at any time to assist in resolving questions or concerns.

Table 1. Intern Mentor Connection to the Department of Speech, Language and Hearing Sciences

#### Mentors-You

Providing supervised professional experience for advanced interns in the field

 $\setminus$ 

# **Community of Practice**

All of our colleagues, including those like you who are working in medical and clinical settings

# **SFSU Faculty Supervisor**

Laura Epstein, Teresa Gray, Nancy Robinson, Marcia Raggio, Gloria Soto, Anusha Sundarrajan, Betty Yu; or one of our adjunct clinical faculty.

SLP School Intern Coordination Team for Department of Speech, Language and Hearing Sciences, SFSU includes Laura Epstein, Betty Yu, Teresa Gray, Anusha Sundarrajan, Michael Clarke

The SLHS Department Chair is Laura Epstein

The Department of Speech, Language and Hearing Sciences abides by ASHA requirements for certification, licensure and completion of the supervision CEU requirement of 2 hours (https://www.asha.org/certification/2020-slp-certification-standards/#4):

Implementation: The guided observation and direct client/patient contact hours must be within the <u>ASHA\_Scope of Practice in Speech-Language Pathology\_</u> and must be under the supervision of a clinician who holds current ASHA certification in the appropriate profession and who, after earning the CCC-SLP, has completed (a) a minimum of 9 months of post-certification, full-time experience (or its part-time equivalent) and (b) a minimum of 2 hours of professional development in the area of clinical instruction/supervision.

Also, From Certification Standard V-E (<a href="https://www.asha.org/certification/2020-slp-certification-standards/">https://www.asha.org/certification/2020-slp-certification-standards/</a>): Supervision of students must be provided by a clinical educator who holds ASHA certification in the appropriate profession and who, after earning the CCC-A or CCC-SLP, has completed (1) a minimum of 9 months of full-time clinical experience (or its part-time equivalent), and (2) a minimum of 2 hours of professional development in clinical instruction/supervision.

The amount of direct supervision must be commensurate with the student's knowledge, skills, and experience; must not be less than 25% of the student's total contact with each client/patient; and must take place periodically throughout the practicum. Supervision must be sufficient to ensure the welfare of the individual receiving services.

# Internship Roles and Responsibilities

# Planning the Internship: Goals and Expectations

The internship process begins with the student's entry into first year of graduate study in speech-language pathology. From the first course and clinical experience, the student is preparing to become a clinically competent professional. Through completion of academic seminars that focus on communicative disorders across the life span and supervised clinical practicum, the student gradually develops mastery to apply theoretical knowledge in the context of clinical interactions with clients, families, instructors, peers and other professionals.

In the second year, graduate students have typically completed prerequisites for internship placements. Two internships are required, one in a school and one in a nonschool setting. Students may select a pediatric or adult focus in the non-school internship. Approximately one-half of the graduate cohort at SFSU complete the nonschool internship prior to the school internship and the other half of the cohort reverse this sequence. Participation in the specialization tracks in Autism Spectrum Disorders and Augmentative and Alternative Communication also change the order of the internships, and usually result in a summer nonschool internship placement in the student's second year.

The placement and selection process to determine individual internship experiences is formally coordinated by SLHS faculty who are assigned to this task. For the school internship, the SLHS Internship Coordination Team refers students to school sites in the greater SF Bay Area and sometimes beyond for informational interviews to determine a mutually positive placement. The student is prepared for the interview by the internship coordinator as if applying for a first professional position, and will bring a resume and samples of clinical writing to this meeting.

Setting Goals and Expectations. Once the intern is selected for an internship, the first step is to determine goals and expectations for the experience. Both the university Department and internship site determine the expected outcomes for the SLP Intern. From the SFSU perspective, the objectives of the school internship are to provide the Intern with the education, training, skill development and experience necessary for the evaluation and treatment of clients in school settings with communication disorders in preschools, elementary schools, middle schools and high schools. Within the site, the Intern is assigned a Mentor and a caseload that gradually increases from shadowing the supervisor, to co-treatment, to leading intervention for part of the caseload, to independent management of a full caseload that reflects the daily schedule of the professional SLPs employed at the site. Specific areas of skill development expected also include the following:

- Collaboration with colleagues, clients, families at the site.
- Participation and contributions to the professional team on site.
- Professionalism in all aspects of the role of an SLP at the site.
- Refinement of documentation (such as use of SEIS), treatment planning, and report writing.
- Mastery of the specific record keeping and documentation system used in the site.
- Completion of all phases of therapy, from referral to assessment, treatment and discharge.
- Attendance and participation, under supervision, in team panels and conferences.
- Attendance at school-wide in-services.
- Completion of related readings, studies, and case presentations to in-service staff during the internship period, as deemed appropriate by the Mentor.

Individual site expectations must also be reviewed and included in the internship plan. The Mentor and SLP intern meet at the beginning of the internship to review evaluation tools provided by the SLHS Department at SFSU, including the *Knowledge and Skills Assessment (KASA) Clinical Evaluation* tool. The KASA provides a comprehensive overview of clinical competency areas that are assessed throughout the student's graduate Department, with increasing mastery expected with each subsequent clinical experience. At the internship level, the intern is expected to demonstrate competency in all areas by the completion of the semester. Additional resources to define goals and expectations of the internship experience include the documents included in the Appendix of this handbook, titled the *Essential Functions Guide* and *Professionalism*. Both of these documents should be reviewed by the Mentor and SLP Intern to clarify competencies and conduct to be mastered in the internship. In addition, individual sites may have specific goals and expectations for interns in document form. These are included in the development of goals to be met by the intern. Agreement and clarification of goals and expectations at the outset of

the internship are

essential for setting benchmarks and indicators of the SLP intern's performance at the midterm and final assessment periods.

Certificate of Clearance and Clearance Requirements. All SFSU student interns have received the Certificate of Clearance through the California Commission on Teacher Credentialing, which is required for admission into the graduate program. School districts may add additional background clearances per their own policies and requirements. While school districts vary in the requirements to be completed, this process can take time and it is helpful to allow at least one month to complete all requirements prior to the start date for the internship. Most commonly, clearance requirements are completed through the Human Resources offices of the school districts. Timely referral of the intern to the HR representative is helpful to complete the clearance process. Common clearance requirements may include the following:

- Background Clearance
- CPR Training
- TB Clearance
- Influenza Vaccination
- HIPPA Certification
- Obtain an ID Badge
- Site Orientation Training

SFSU Requirements for Interns and Mentors. The SLP Intern is expected to meet the requirements of the intern site, as a professional SLP employed by the site. For example, on the days that the SLP Intern is onsite, he/she is expected to keep the same schedule as the professional SLPs at the site. The schedule and working requirements of the site are the primary determinants of the SLP Intern's daily plan for the semester. However, the SLP Intern also remains a student at SFSU with related requirements as follows:

#### Intern Requirements

- The SLP Intern is available to participate at the site for a maximum of 4 working days each week.
- The internship begins and ends with the semester dates, unless other dates are agreed with SFSU, the site and the intern.
- The SLP Intern is expected to participate in monthly seminars on the SFSU campus, typically on Friday
  afternoons
- The SLP Intern is expected to participate in one academic course and clinic, typically on Fridays.
- The SLP Intern is required to complete a minimum of 150 direct client/patient contact hours and approximately 50-75 additional residency hours during the semester.
- The SLP Intern is required to participate in the internship the entire semester, with specific beginning and ending dates agreed upon by the site Mentor, intern and SFSU Faculty Supervisor even if minimum clinical clock hours are met prior to the end date.

# Mentor Requirements

- Mentors must hold current ASHA certification (CCC) and CA state license. They must have completed the 2-hour ASHA Supervision CEU Requirement as verified on the ASHA website.
- Provide a scanned copy of Mentor's CCC and CA state license to Mallorie Desimone prior to the beginning of the semester by email: <a href="mailorie@sfsu.edu">mallorie@sfsu.edu</a> and upload to the SLHS 712 Canvas site.
- As is stated in the implementation language for ASHA Certification Standard V-E, "supervision must be in real time and must never be less than 25% of the student's total contact with each client/patient. Supervision must take place periodically throughout the practicum experience."
- Mentors are requested to review the following documents for more information about ASHA supervision requirements, Code of Ethics, and Scope of Practice.

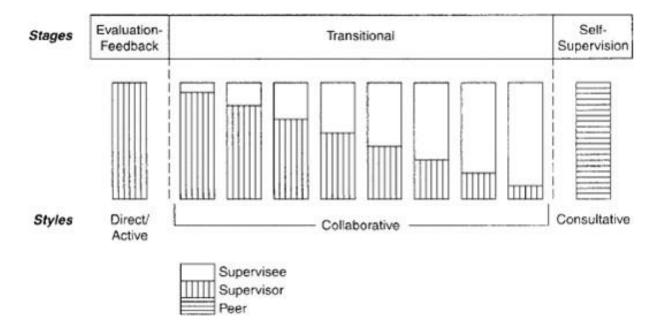

- o The ASHA Code of Ethics (2023): https://www.asha.org/policy/et2016-00342/
- Issues in Ethics: Supervision of Student Clinicians (2017): <a href="https://www.asha.org/practice/ethics/supervision-of-student-clinicians/">https://www.asha.org/practice/ethics/supervision-of-student-clinicians/</a>
- The ASHA Scope of Practice in Speech-Language Pathology: https://www.asha.org/policy/sp2016-00343/
- Mentors will provide student clinicians with oral and/or written feedback that contains both positive
  comments and constructive criticism during observed therapy sessions and on paperwork and other
  clinical activities, as required for each individual site.
- Mentors are responsible for the following documents at the midterm and final date of the semester:
  - Complete and sign mid---term KASA forms; student will place forms in their SFSU Faculty Supervisor's mailbox.
  - Complete and sign final KASA forms; student will place forms in their SFSU Faculty Supervisor's mailbox.
  - Sign student clinician's ASHA clinic clock hours form; student will place forms in their department-issued Box folder
- **Standard Precautions.** Standard Precautions protect clinicians, clients, students and patients from invention (https://www.asha.org/practice/infection-control).
  - Policy:
    - The SLHS Nicholas J. Certo Clinic adheres to Standard Precautions to protect clinicians, clients, students and patients from infection.
    - Compliance is evaluated every semester
  - Procedures
    - Please note that KASA evaluation includes universal precautions compliance.

# Supervision Requirements and Process

Once you decide to take an intern, you will probably start thinking about how you will structure the intern's experience over the course of the semester. While the KASA is a research-based tool that you can use to determine expected competencies for the intern, it is helpful to have a sequence of milestones for your intern to move through as they work towards their final skill set. This will make the intern feel more comfortable, as they will have a better sense of what is expected of them week to week. Included in the Appendix is an *Intern Learning Sequence Worksheet* that you are free to use or to modify to suit the requirements of your site.

Ways to structure the interns' experiences vary quite a bit. Much will depend on the way your site is organized, your school community, your workload, and the student. Below is a visual of what the experience might look like when it is conceptualized in terms of a transition from dependence to independence or self-supervision.

Continuum of supervision. From *The Supervisory Process in Speech-Language Pathology and Audiology* (p. 25), by E. S. McCrea and J. A. Brasseur, 2003, Boston: Allyn and Bacon. Copyright © 2003 by Pearson Education. Reprinted by permission of the publisher.

# As Anderson (1988) stated:

The continuum mandates a change over time in the amount and type of involvement of both the supervisor and the supervisee in the supervisory process. As the amount of direction by the supervisor decreases, the amount of participation by the supervisee increases across the continuum. The stages (evaluation-feedback, transitional, self-supervision) should not be viewed as time-bound, as any individual supervisee may be found at any point on the continuum depending on situational variables as well as the knowledge and skill of the supervisee. The model stresses the importance of modifying the supervisor's style in response to the needs, knowledge, and skills of the supervisee at each stage of clinical development. This model also fosters professional growth on the part of both the supervisor and the supervisee.

Immediately below are descriptions from three highly experienced mentors as they describe how they structure their intern's experience. As you will see, ways to structure the interns' experiences vary quite a bit. Much will depend on the way your site is organized, your school community, your workload, and the student.

\*\*\*\*\*\*\*\*\*\*\*\*

#### SLP 1:

In fall I do: one week setting up new caseload/and SEIS training, one week intern observes, two weeks sitting together doing therapy, two weeks I am in room but not sitting with the group but observing and will roll over to the group if things aren't going well and I will intervene; rest of the time they have a full two day or two and half day per week caseload and one half day or one full day per week they write reports/do assessments depending on how many assessments are due.

In spring, they start with the one-week observation since we are up and running.

I am mostly always in the room working so I am aware of what is going on but I am not formally observing - will intervene if things are really falling apart but usually give feedback after the session is over.

\*\*\*\*\*\*\*\*\*\*\*

#### SLP 2:

It depends on the skill/ability/confidence of the intern but this is my general guideline:

Observe for a week or two.

Start working with me in the groups for a week or two.

Take on the kids/groups they think they can work with while continuing to work with me in other groups.

They do an evaluation as soon as it needs to be done, no matter when they start the internship. If they are not confident at the time the evaluation needs to be done then they do the next one, but usually that is something they feel more comfortable with over therapy, especially in middle school. I have them write 3-4 reports, on average. Some need much more support with writing, others are solid.

The caseload trickles in over time and they have the full caseload a couple weeks before or at the midterm, at the latest (for most interns). I am always available to pop in to support whenever they need it, unless I am out for a meeting:-)

They reach out to teachers to collaborate for the sessions of the day as they take on more kids.

I work with the intern on grasping the system, reviewing files, etc. throughout the entire experience but of course heavier at the beginning.

\*\*\*\*\*\*\*\*\*\*\*\*

SLP 3:

That is roughly how the internships are organized at my site. That being said, assessments and IEP schedules take the precedence in determining how the internships run their course. Also, I increase the caseloads for interns as I see evidence of growth, AND I'm getting positive feedback from the high school students receiving service (e.g., having a good social emotional match). I have frequently not given over the full caseload due to a high volume of assessments.

# Role of the SFSU Faculty Supervisor

A site visitor from SFSU has been assigned to you and your intern for the semester as your SFSU liaison. This person is the SFSU faculty with whom your intern is registered at SFSU, and is responsible for recording the grade that you give your intern for the school internship experience. Your SFSU faculty supervisor is the person to contact should any difficulties arise during the semester in which you are working with your intern, or if you have any questions at all. They will contact you, either by phone email, videoconference, or in person at your site at least four times per semester. *The Intern Data Sheet*, included in the Appendix provides contact information, the schedule that you have established with your intern, and your location to the SFSU site visitor who is assigned to be your SFSU Faculty Supervisor. The Intern Data Sheet is to be filled out and faxed to the SLHS Clinic Office at 415.338.0916. The SFSU Faculty Supervisor will then contact you to set up an appointment to visit.

What to expect during your SFSU Site Visit. Using the information from the internship site visit list, your SFSU site visitor will email you and your intern to set up an appointment to visit your site, either in person or virtually. SFSU site visitors may request a variety of observations and interviews during their visit, depending on what is convenient to you and your site, as well as their personal style. They typically observe the intern doing assessment or therapy or both. They also may interview you and the student. Some may prefer to interview you and your student separately if possible, while others may not. They may also request to meet with you and your intern together. During the meetings, topics of discussion may include the variety of experiences the intern is receiving, how independent is the intern, how well the intern is upholding professional and clinical standards, and what are goals for the internship for the remainder of the semester. Either during the site visit, or once the SFSU site visit has been completed, the site visitor will fill out the SFSU Site Visit Report, on which the details of the visit have been recorded. You will receive this document via email, with your intern and the school internship coordinator copied, so that everyone is kept in the loop.

## Formative and Summative Evaluation

Evaluation of the intern's progress in your site is an ongoing process. Each time you observe the intern and provide feedback is an opportunity to assess how the intern is performing, both in clinical interaction skills and collaboration with colleagues and families. The KASA tool provides an objective measure that can be both a formative and summative evaluation measure. Initially, it is helpful to review the KASA to define clinical competency and professional expectations for the intern. The KASA was developed as a means to gauge the increasing independence and self-evaluation skills of the intern through beginning, intermediate and advanced clinical experiences. The internship is considered to be at an advanced level. The intern is expected to demonstrate proficiency in all of the skills identified on the KASA at the end of the semester. However, this is a gradual process and requires reference to the KASA throughout the experience, in order to gauge the intern's performance and ability to identify areas of further professional development. The Mentor is encouraged to periodically ask the intern to review the KASA and to self-assess regarding individual progress and development of goals for improvement. Regular, ongoing assessment can also be supported by reference to other tools included in this handbook, Professionalism and the Essential Functions. Conferencing with the intern weekly is an effective means to identify strengths and areas needing improvement in an ongoing manner, rather than only conducting midterm and final evaluations.

# Responsibilities of the Intern

The internship is an important professional commitment, both to a student's clinical training, and to the mentor who decides to devote time and attention to working closely with a student intern. The student's professional role extends far beyond just showing up and earning clinical clock hours, to the full range of professional roles expected of the student intern at the site. Clinical competency and professional conduct include a range of skills that are identified in tools included in this handbook and described above. In addition, the site Mentor may define additional responsibilities that are expected of professional SLPs in the site. These responsibilities may include participation at team meetings, case conferences, family counseling, presentation of in-service training, etc. As an intern, the student is expected to participate fully in all aspects of the professional SLP role at the site, contributing positively to the effectiveness of service delivery for patients/clients and families.

Beyond the requirement of direct patient/client contact hours, interns are responsible for completing a residency hours requirement at their internship of between 50-75 hours. The residency requirement is intended to assure that the intern participates fully in all aspects of the professional role expected at the site. Residency hours are not counted toward the total 400 clock hours required by ASHA, yet this requirement is meant to assist the intern become a full participant in activities listed earlier. These are important times in an internship, because it is during these times that professionalism and a deep sense of the role of the speech-language pathologist is imparted. These learning moments take time, and the residency hours capture this key time commitment required by the intern.

Objective measures of professional behaviors and responsibilities are captured in the KASA sections on Professional and Personal Qualities, and Response to Supervision and documents on *Essential Functions* and *Professionalism*. Professional requirements such as reliability, punctuality, respect, ethical conduct, and organization are described in the section on Professional and Personal Qualities. In the section on Response to Supervision, qualities such as being reflective, openly discussing differences, confidence, and dealing with frustration are addressed. The Response to Supervision section is a good place to look for qualities about the relationship between mentor and intern.

Interns must fill out their clinical clock hours log every day they are at your internship site. When their internship is finished, you must sign the log at the bottom. The intern also complete one of the *Clinical Clock Hours* (SC10) form for each category of articulation, language, voice, fluency, related disorders, dysphagia, and audiology, with the total number of clinical clock hours earned for each category, and provide these for you to sign. The student has access to a SLHS Department Clock Hours Tracking Spreadsheet that calculates totals required for CCC and licensure.

All clinical contact forms must be uploaded to the student's Box Folder.

# Guideline for Internship Hours

ASHA requires that students need to earn a total of at least 400 hours of clinical contact over the course of their clinical training. In our Department, we target a total of **160 clinical contact hours for each internship**.

As a general guide, students should obtain about 150 clinical clock hours in each of their internship experiences, in order to make a total of 400 clinical clock hours over the course of their clinical training. A breakdown of all clinical clock hours obtained during training at SFSU follows:

- 25 Observation Hours
- 75 On-Campus Clinic Hours (2 880's and course-specific virtual hours students may earn more than 50 hours in this phase of their training)
- 160 School Internship Hours
- 160 Nonschool Internship Hours

# **Addressing Concerns**

Even when all expectations, goals, supervision, and assessment process are clear, there are times when concerns arise with individual interns. In cases where Mentors have concerns about individual intern performance at the site, communication with the SFSU Faculty Supervisor is key. It is a good practice to cc the SFSU Faculty Supervisor on all email communication between the Mentor and Intern, in order to address any questions or concerns that arise through a team approach. It is important for the Intern to know that the Mentor is connected to SFSU and that communication is open and transparent regarding the internship expectations, goals and performance. The SFSU Faculty Supervisor is available throughout the semester to consult with the Mentor and the Intern together or individually regarding potential misunderstandings, questions and concerns that may arise. In addition, a member of the Internship Coordination Team is always available to support the team by contacting:

Laura Epstein at <a href="lepstein@sfsu.edu">lepstein@sfsu.edu</a>.
Betty Yu at <a href="bettyyu@sfsu.edu">bettyyu@sfsu.edu</a>
Teresa Gray at <a href="teresag@sfsu.edu">teresag@sfsu.edu</a>
Anusha Sundarrajan at <a href="manusha@sfsu.edu">anusha@sfsu.edu</a>
Michael Clarke at <a href="michaelclarke@sfus.edu">michaelclarke@sfus.edu</a>

Documentation of concerns is also crucial and email can be an effective means to identify and log the sequence of communication regarding a particular issue. For example, when the intern may not always be on time, the Mentor can document these occasions and provide objective information rather for both the SFSU Faculty Supervisor and intern to address. When the concern centers on the intern's clinical performance or professional conduct, notes and dates to document particular observations can be helpful to identify the basis of the concern and to develop a remediation plan. The earlier a concern is identified and brought to the attention of all involved: the intern, the Mentor and the SFSU Faculty Supervisor, the sooner a plan can be developed for a positive outcome.

Course Evaluation Based on Skill Level (B- or better to pass)

Midterm:	
☐ Pass	☐ Repeat
Final:	
☐ Pass	☐ Repeat

# Skill Level

# Beginning student clinician (1st client)

- High degree of supervisory support
- Can recall some aspects of relevant theory
- Needs support to:
  - Draw conclusions about a client
  - Develop a plan for action
  - Understand the total clinical situation
  - o Apply problem solving strategies, principles and theory
- Spends a high degree of time and effort in meeting clinical responsibilities
- Highly focused on own performance rather than the client

# Intermediate student clinician (2<sup>nd</sup>/3<sup>rd</sup>/Additional client)

- The complexity of the client, the workplace environment and the student's previous experience determines:
  - Degree of supervision (moderate to low)
  - Ability to recognize the meaningful aspects of the situation
- Recognizes several aspects of a problem but not all, and related these to the client's needs and is able to:
  - o Draw some accurate conclusions about a client
  - Develop some plans for action
  - o Recognize some important aspects of the total clinical situation
- Requires support to:
  - Recognize and prioritize all aspects of a situation
  - o Flexibly apply problem solving strategies, principles and theory
- Developing automaticity resulting in:
  - A moderate expenditure of time and effort
  - o Greater ability to focus on the situation than on own performance
  - A developing ability to use observations to assist clinical reasoning

# Advanced student clinician (school/adult internship)

- Performs the majority of his/her work independently and competently
- Seeks support if the situation is new or a number of features about the client or workplace setting combine to create complexity
- Identifies the meaningful aspects of problems and integrate these to generate a number of logically possible conclusions; conclusions/actions will be modified with new information
- Prioritizes appropriately
- Is sufficiently automatic and maintain a focus on the client or situation
- Carries out his/her work in an efficient and timely manner

# Suggested Intern Learning Sequence Worksheet (Adapt as needed for each Site)

Student:	
Mentor:	
Site:	Semester/Year:

Week	Milestone	Achieved: Yes/No	Actions taken to provide additional learning support (only if needed)
Week 1	Student participates in the set-up of caseload/familiarizes with caseload; SEIS training		
Week 2	Observation		
Week 3-4	Co-therapy		
Week 5-6	Intern begins to do therapy independently; mentor observes and steps in whenever necessary		
Week 6-8	Student begins to conduct assessments, writes up one report; Student is working with full case load; Student decreases need for mentor to step in		
Week 8-12	Student increases assessment, writes up 3 reports		
Week 12-14	Student participates in one IEP		
Week 14-16	Student conducts one IEP

By signing this form, the supervisor/clinical instructor affirms that "At least 50% of each diagnostic evaluation, including screening and identification, was observed directly," and/or "At least 25% of the student's total contact time in clinical treatment was observed directly."

\*Types of clinical settings include separate units/settings within an institution or its affiliates (brain injury units/stroke units/nursing homes/classrooms for severely language-impaired children), community clinics, public schools, rehabilitation centers, hospitals, and private practice settings. For the 3 clinical settings to be classified as different settings, it must be determined that the student has gained unique experiences in each one (i.e., public schools: pull-out services versus a classroom for children who present communication disorders; or hospital: acute-care versus long-term care).

#### ASHA Code of Ethics

PREAMBLE The American Speech-Language-Hearing Association (ASHA; hereafter, also known as "the Association") has been committed to a framework of common principles and standards of practice since ASHA's inception in 1925. This commitment was formalized in 1952 as the Association's first Code of Ethics. This code has been modified and adapted to reflect the current state of practice and to address evolving issues within the professions. The ASHA Code of Ethics reflects professional values and expectations for scientific and clinical practice. It is based on principles of duty, accountability, fairness, and responsibility and is intended to ensure the welfare of the consumer and to protect the reputation and integrity of the professions. The Code of Ethics is a framework and a guide for professionals in support of day-today decision making related to professional conduct. The Code of Ethics is obligatory and disciplinary as well as aspirational and descriptive in that it defines the professional's role. It is an integral educational resource regarding ethical principles and standards that are expected of audiologists, speech-language pathologists, and speech, language, and hearing scientists. The preservation of the highest standards of integrity and ethical principles is vital to the responsible discharge of obligations by audiologists, speech-language pathologists, and speech, language, and hearing scientists who serve as clinicians, educators, mentors, researchers, supervisors, and administrators. This Code of Ethics sets forth the fundamental principles and rules considered essential to this purpose and is applicable to the following individuals: • a member of ASHA holding the Certificate of Clinical Competence • a member of ASHA not holding the Certificate of Clinical Competence • a nonmember of ASHA holding the Certificate of Clinical Competence • an applicant for ASHA certification or for ASHA membership and certification ASHA members who provide clinical services must hold the Certificate of Clinical Competence and must abide by the Code of Ethics. By holding ASHA certification and/or membership, or through application for such, all individuals are subject to the jurisdiction of the ASHA Board of Ethics for ethics complaint adjudication. The fundamentals of ethical conduct are described by Principles of Ethics and by Rules of Ethics. The four Principles of Ethics form the underlying philosophical basis for the Code of Ethics and are reflected in the following areas: (I) responsibility to persons served professionally and to ASHA Code of Ethics research participants; (II) responsibility for one's professional competence; (III) responsibility to the public; and (IV) responsibility for professional relationships. Individuals shall honor and abide by these Principles as affirmative obligations under all conditions of applicable professional activity. Rules of Ethics are specific statements of minimally acceptable as well as unacceptable professional conduct. The Code of Ethics is designed to provide guidance to members, certified individuals, and applicants as they make professional decisions. Because the Code of Ethics is not intended to address specific situations and is not inclusive of all possible ethical dilemmas, professionals are expected to follow its written provisions and to uphold its spirit and purpose. Adherence to the Code of Ethics and its enforcement results in respect for the professions and positive outcomes for those who benefit from the work of audiologists, speech-language pathologists, and speech, language, and hearing scientists.

## PRINCIPLE OF ETHICS I

Individuals shall honor their responsibility to hold paramount the welfare of persons they serve professionally or who are participants in research and scholarly activities.

## **RULES OF ETHICS**

A. Individuals shall provide all clinical services and scientific activities competently.

- B. Individuals shall use every resource, including referral and/or interprofessional collaboration when appropriate, to ensure that quality service is provided.
- C. Individuals shall not discriminate in the delivery of professional services or in the conduct of research and scholarly activities on the basis of age; citizenship; disability; ethnicity; gender; gender expression; gender identity; genetic information; national origin, including culture, language, dialect, and accent; race; religion; sex; sexual orientation; or veteran status.
- D. Individuals shall not misrepresent the credentials of aides, assistants, technicians, students, research assistants, Clinical Fellows, or any others under their supervision, and they shall inform those they serve professionally of the name, role, and professional credentials of persons providing services.
- E. Individuals who hold the Certificate of Clinical Competence may delegate tasks related to the provision of clinical services to aides, assistants, technicians, or any other persons only if those persons are adequately prepared and are appropriately supervised. ASHA Code of Ethics responsibility for the welfare of those being served remains with the certified audiologist or speech-language pathologist.
- F. Individuals who hold the Certificate of Clinical Competence shall not delegate tasks that require the unique skills, knowledge, judgment, or credentials that are within the scope of their profession to aides, assistants, technicians, or any nonprofessionals over whom they have supervisory responsibility.
- G. Individuals who hold the Certificate of Clinical Competence may delegate to students tasks related to the provision of clinical services that require the unique skills, knowledge, and judgment that are within the scope of practice of their profession only if those students are adequately prepared and are appropriately supervised. The responsibility for the welfare of those being served remains with the certified audiologist or speech language pathologist.
- H. Individuals shall obtain informed consent from the persons they serve about the nature and possible risks and effects of services provided, technology employed, and products dispensed. This obligation also includes informing persons served about possible effects of not engaging in treatment or not following clinical recommendations. If diminished decision-making ability of persons served is suspected, individuals should seek appropriate authorization for services, such as authorization from a legally authorized/appointed representative.
- I. Individuals shall enroll and include persons as participants in research or teaching demonstrations/simulations only if participation is voluntary, without coercion, and with informed consent.
- J. Individuals shall accurately represent the intended purpose of a service, product, or research endeavor and shall abide by established guidelines for clinical practice and the responsible conduct of research, including humane treatment of animals involved in research.
- K. Individuals who hold the Certificate of Clinical Competence shall evaluate the effectiveness of services provided, technology employed, and products dispensed, and they shall provide services or dispense products only when benefit can reasonably be expected.
- L. Individuals who hold the Certificate of Clinical Competence shall use independent and evidence-based clinical judgment, keeping paramount the best interests of those being served. M. Individuals may make a reasonable statement of prognosis, but they shall not guarantee—directly or by implication—the results of any treatment or procedure.
- N. Individuals who hold the Certificate of Clinical Competence may provide services via telepractice consistent with professional standards and state and federal regulations, but they shall not provide clinical services solely by written communication.
- O. Individuals shall protect the confidentiality and security of records of professional services provided, research and scholarly activities conducted, and products dispensed. Access to these records shall be allowed only when doing so is legally authorized or required by law.
- P. Individuals shall protect the confidentiality of information about persons served professionally or participants involved in research and scholarly activities. Disclosure of confidential information shall be allowed only when doing so is legally authorized or required by law.
- Q. Individuals shall maintain timely records; shall accurately record and bill for services provided and products dispensed; and shall not misrepresent services provided, products dispensed, or research and scholarly activities conducted.
- R. Individuals shall not allow personal hardships, psychosocial distress, substance use/misuse, or physical or mental

health conditions to interfere with their duty to provide professional services with reasonable skill and safety. Individuals whose professional practice is adversely affected by any of the above-listed factors should seek professional assistance regarding whether their professional responsibilities should be limited or suspended. S. Individuals who have knowledge that a colleague is unable to provide professional services with reasonable skill and safety shall report this information to the appropriate authority, internally if such a mechanism exists and, when appropriate, externally to the applicable professional licensing authority or board, other professional regulatory body, or professional association.

T. Individuals shall give reasonable notice to ensure continuity of care and shall provide information about alternatives for care in the event that they can no longer provide professional services.

PRINCIPLE OF ETHICS II Individuals shall honor their responsibility to achieve and maintain the highest level of professional competence and performance.

#### **RULES OF ETHICS**

- A. Individuals who hold the Certificate of Clinical Competence shall engage in only those aspects of the professions that are within the scope of their professional practice and competence, considering their certification status, education, training, and experience.
- B. ASHA members who do not hold the Certificate of Clinical Competence may not engage in the provision of clinical services; however, individuals who are in the certification application process may provide clinical services consistent with current local and state laws and regulations and with ASHA certification requirements.
- C. Individuals shall enhance and refine their professional competence and expertise through engagement in lifelong learning applicable to their professional activities and skills.
- D. Individuals who engage in research shall comply with all institutional, state, and federal regulations that address any aspects of research.
- E. Individuals in administrative or supervisory roles shall not require or permit their professional staff to provide services or conduct research activities that exceed the staff member's certification status, competence, education, training, and experience.
- F. Individuals in administrative or supervisory roles shall not require or permit their professional staff to provide services or conduct clinical activities that compromise the staff member's independent and objective professional judgment.
- G. Individuals shall use technology and instrumentation consistent with accepted professional guidelines in their areas of practice. When such technology is warranted but not available, an appropriate referral should be made.
- H. Individuals shall ensure that all technology and instrumentation used to provide services or to conduct research and scholarly activities are in proper working order and are properly calibrated.

PRINCIPLE OF ETHICS III In their professional role, individuals shall act with honesty and integrity when engaging with the public and shall provide accurate information involving any aspect of the professions.

## **RULES OF ETHICS**

- A. Individuals shall not misrepresent their credentials, competence, education, training, experience, or scholarly contributions.
- B. Individuals shall avoid engaging in conflicts of interest whereby a personal, professional, financial, or other interest or relationship could influence their objectivity, competence, or effectiveness in performing professional responsibilities. If such conflicts of interest cannot be avoided, proper disclosure and management is required.
- C. Individuals shall not misrepresent diagnostic information, services provided, results of services provided, products dispensed, effects of products dispensed, or research and scholarly activities.
- D. Individuals shall not defraud, scheme to defraud, or engage in any illegal or negligent conduct related to obtaining payment or reimbursement for services, products, research, or grants.
- E. Individuals' statements to the public shall provide accurate information regarding the professions, professional services and products, and research and scholarly activities.
- F. Individuals' statements to the public shall adhere to prevailing professional standards and shall not contain

misrepresentations when advertising, announcing, or promoting their professional services, products, or research. G. Individuals shall not knowingly make false financial or nonfinancial statements and shall complete all materials honestly and without omission.

#### PRINCIPLE OF ETHICS IV

Individuals shall uphold the dignity and autonomy of the professions, maintain collaborative and harmonious interprofessional and intraprofessional relationships, and accept the professions' self-imposed standards.

#### **RULES OF ETHICS**

- A. Individuals shall work collaboratively with members of their own profession and/or members of other professions, when appropriate, to deliver the highest quality of care.
- B. Individuals shall exercise independent professional judgment in recommending and providing professional services when an administrative directive, referral source, or prescription prevents them from keeping the welfare of persons served paramount.
- C. Individuals' statements to colleagues about professional services, products, or research results shall adhere to prevailing professional standards and shall contain no misrepresentations.
- D. Individuals shall not engage in any form of conduct that adversely reflects on the professions or on the individual's fitness to serve persons professionally.
- E. Individuals shall not engage in dishonesty, negligence, deceit, or misrepresentation.
- F. Individuals who mentor Clinical Fellows, act as a preceptor to audiology externs, or supervise undergraduate or graduate students, assistants, or other staff shall provide appropriate supervision and shall comply—fully and in a timely manner—with all ASHA certification and supervisory requirements.
- G. Applicants for certification or membership, and individuals making disclosures, shall not make false statements and shall complete all application and disclosure materials honestly and without omission.
- H. Individuals shall not engage in any form of harassment or power abuse.
- I. Individuals shall not engage in sexual activities with persons over whom they exercise professional authority or power, including persons receiving services, other than those with whom an ongoing consensual relationship existed prior to the date on which the professional relationship began.
- J. Individuals shall not knowingly allow anyone under their supervision to engage in any practice that violates the Code of Ethics.
- K. Individuals shall assign credit only to those who have contributed to a publication, presentation, process, or product. Credit shall be assigned in proportion to the contribution and only with the contributor's consent.
- L. Individuals shall reference the source when using other persons' ideas, research, presentations, results, or products in written, oral, or any other media presentation or summary. To do otherwise constitutes plagiarism.
- M. Individuals shall not discriminate in their relationships with colleagues, members of other professions, or individuals under their supervision on the basis of age; citizenship; disability; ethnicity; gender; gender expression; gender identity; genetic information; national origin, including culture, language, dialect, and accent; race; religion; sex; sexual orientation; socioeconomic status; or veteran status.
- N. Individuals with evidence that the Code of Ethics may have been violated have the responsibility to either work collaboratively to resolve the situation where possible or to inform the Board of Ethics through its established procedures.
- O. Individuals shall report members of other professions who they know have violated standards of care to the appropriate professional licensing authority or board, other professional regulatory body, or professional association when such violation compromises the welfare of persons served and/or research participants.
- P. Individuals shall not file or encourage others to file complaints that disregard or ignore facts that would disprove the allegation; the Code of Ethics shall not be used for personal reprisal, as a means of addressing personal animosity, or as a vehicle for retaliation.

- Q. Individuals making and responding to complaints shall comply fully with the policies of the Board of Ethics in its consideration, adjudication, and resolution of complaints of alleged violations of the Code of Ethics.
- R. Individuals involved in ethics complaints shall not knowingly make false statements of fact or withhold relevant facts necessary to fairly adjudicate the complaints.
- S. Individuals shall comply with local, state, and federal laws and regulations applicable to professional practice and to the responsible conduct of research.
- T. Individuals who have been convicted of, been found guilty of, or entered a plea of guilty or nolo contendere to (1) any misdemeanor involving dishonesty, physical harm—or the threat of physical harm—to the person or property of another or (2) any felony shall selfreport by notifying the ASHA Ethics Office in writing within 60 days of the conviction, plea, or finding of guilt. Individuals shall also provide a copy of the conviction, plea, or nolo contendere record with their self-report notification, and any other court documents as reasonably requested by the ASHA Ethics Office.
- U. Individuals who have (1) been publicly disciplined or denied a license or a professional credential by any professional association, professional licensing authority or board, or other professional regulatory body; or (2) voluntarily relinquished or surrendered their license, certification, or registration with any such body while under investigation for alleged unprofessional or improper conduct shall self-report by notifying the ASHA Ethics Office in writing within 60 days of the final action or disposition. Individuals shall also provide a copy of the final action, sanction, or disposition—with their self-report notification—to the ASHA Ethics Office.

#### ASHA Code of Ethics

TERMINOLOGY The purpose of the following Terminology section is to provide additional clarification for terms not defined within the Principles of Ethics and Rules of Ethics sections.

# **ASHA Ethics Office**

The ASHA Ethics Office assists the Board of Ethics with the confidential administration and processing of self-reports from and ethics complaints against individuals (as defined below). All complaints and self-reports should be sent to this office. The mailing address for the ASHA Ethics Office is American Speech-Language-Hearing Association, attn: Ethics Office, 2200 Research Blvd., #309, Rockville, MD 20850. The email address is ethics@asha.org. advertising Any form of communication with the public regarding services, therapies, research, products, or publications. diminished decision-making ability The inability to comprehend, retain, or apply information necessary to determine a reasonable course of action.

#### individuals

Within the Code of Ethics, this term refers to ASHA members and/or certificate holders and applicants for ASHA certification.

#### informed consent

An agreement by persons served, those with legal authority for persons served, or research participants that constitutes authorization of a proposed course of action after the communication of adequate information regarding expected outcomes and potential risks. Such an agreement may be verbal or written, as required by applicable law or policy.

#### may vs. shall

May denotes an allowance for discretion; shall denotes something that is required. misrepresentation Any statement by words or other conduct that, under the circumstances, amounts to an assertion that is false, erroneous, or misleading (i.e., not in accordance with the facts).

#### negligence

Failing to exercise a standard of care toward others that a reasonable or prudent person would use in the circumstances, or taking actions that a reasonable person would not. nolo contendere A plea made by a defendant stating that they will not contest a criminal charge.

# plagiarism

Representation of another person's idea, research, presentation, result, or product as one's own through irresponsible citation, attribution, or paraphrasing.

#### publicly disciplined

A formal disciplinary action of public record. reasonable or reasonably Being supported or justified by fact or circumstance and being in accordance with reason, fairness, duty, or prudence.

# self-report

A professional obligation of self-disclosure that requires (a) notifying the ASHA Ethics Office in writing and (b) sending a copy of the required documentation to the ASHA Ethics Office (see definition of "written" below).

#### shall vs. may

Shall denotes something that is required; may denotes an allowance for discretion.

#### telepractice

Application of telecommunications technology to the delivery of audiology and speechlanguage pathology professional services at a distance by linking clinician to client/patient/student or by linking clinician to clinician for assessment, intervention, consultation, or supervision. The quality of the service should be equivalent to that of inperson service. For more information, see Telepractice on the ASHA Practice Portal. written Encompasses both electronic and hard-copy writings or communications.

#### **PROFESSIONALISM**

Chial, M. (1998). Conveying expectations about professional behavior. Audiology Today, 10 (4), p. 25.

Speech-language pathology is a professional discipline. Professions require certain behaviors of their practitioners. Professional behaviors (which may or may not directly involve other people) have to do with professional tasks and responsibilities, with the individuals served by the profession and with relations with other professionals. Included among professional tasks are education and training. The following conveys expectations about the behaviors of those who seek to join this profession.

- 1. You show up.
- 2. You show up on time.
- 3. You show up prepared.
- 4. You show up in a frame of mind appropriate to the professional task.
- 5. You show up properly attired.
- 6. You accept the idea that "on time," "prepared," "appropriate," and "properly" are defined by the situations, by the nature of the task, or by another person.
- 7. You accept that your first duty is to the ultimate welfare of the persons served by your profession, and that "ultimate welfare" is a complex mix of desires, wants, needs, abilities and capacities.
- 8. You recognize that professional duties and situations are about completing tasks and about solving problems in ways that benefit others, either immediately or in the long term. They are not about you. When you are called upon to behave as a professional, you are not the patient, the customer, the star, or the victim.
- 9. You place the importance of professional duties, tasks and problem solving above your own convenience.
- 10. You strive to work effectively with others for the benefit of the person served. This means you pursue professional duties, tasks and problem solving in ways that make it easier (not harder) for others to accomplish their work.
- 11. You properly credit others for their work.
- 12. You sign your work.
- 13. You take responsibility for your actions, your reactions, and your inaction. This means you do not avoid responsibility by offering excuses, by blaming others, by emotional displays, or by helplessness.
- 14. You do not accept professional duties or tasks for which you are personally or professionally unprepared.
- 15. You do what you say you will do. By the time you said you would do it. To the extent you said you would do it. And to the degree of quality you said you would do it.
- 16. You take active responsibility for expanding the limits of your knowledge, understanding, and skill.
- 17. You vigorously seek and tell the truth, including those truths that may be less than flattering to you.
- 18. You accept direction (including correction) from those who are more knowledgeable or more experienced. You provide direction (including correction) to those who are less knowledgeable or less experienced.
- 19. You value the resources required to perform professional duties, tasks, and problem solving, including your time and that of others.
- 20. You accord respect to the values, interests, and opinions of others that may differ from your own, as long as they are not objectively harmful to the persons served.
- 21. You accept the fact that others may establish objectives for you. While you may not always agree with those goals, or may not fully understand them, you will pursue them as long as they are not objectively harmful to the persons served.
- 22. When you attempt a task for the second time, you seek to do it better than you did it the first time. You revise the ways you approach professional duties, tasks, and problem solving in consideration of peer judgments of best practices.
- 23. You accept the imperfections of the world in ways that do not compromise the interests of those you serve, or your own pursuit of excellence.
- 24. You base your opinions, actions, and relations with others upon sound empirical evidence, and upon examined personal values consistent with the above.
- 25. You expect all of the above from other professionals.
