Skill Level

Beginning student clinician (1st client)

- High degree of supervisory support
- Can recall some aspects of relevant theory
- Needs support to:
 - o Draw conclusions about a client
 - Develop a plan for action
 - Understand the total clinical situation
 - \circ $\;$ Apply problem solving strategies, principles and theory
- Spends a high degree of time and effort in meeting clinical responsibilities
- Highly focused on own performance rather than the client

Intermediate student clinician (2nd/3rd/Additional client)

- The complexity of the client, the workplace environment and the student's previous experience determines:
 - Degree of supervision (moderate to low)
 - Ability to recognize the meaningful aspects of the situation
- Recognizes several aspects of a problem but not all, and related these to the client's needs and is able to:
 - o Draw some accurate conclusions about a client
 - Develop some plans for action
 - Recognize some important aspects of the total clinical situation
- Requires support to:
 - Recognize and prioritize all aspects of a situation
 - Flexibly apply problem solving strategies, principles and theory
- Developing automaticity resulting in:
 - o A moderate expenditure of time and effort
 - Greater ability to focus on the situation than on own performance
 - \circ $\;$ A developing ability to use observations to assist clinical reasoning

Advanced student clinician (school/adult internship)

- Performs the majority of his/her work independently and competently
- Seeks support if the situation is new or a number of features about the client or workplace setting combine to create complexity
- Identifies the meaningful aspects of problems and integrate these to generate a number of logically possible conclusions; conclusions/actions will be modified with new information
- Prioritizes appropriately
- Is sufficiently automatic and maintain a focus on the client or situation
- Carries out his/her work in an efficient and timely manner
